<TEXT>This must be a "George Bush thing." Take (again) from the poor or thrifty to help his big business friends make even MORE money. Just like his plan to use our social security in unsafe investing! I say NO..NO..NO to this proposal!! I only use my phone for security purposes (car trouble, etc.) not for general talking. Don't punish me because I am careful with my phone use!

I do not want to pay more for my telephone service! I urge you to reject a flat fee proposal that would change how contributions are made to the Universal Service Fund. I am concerned that this proposal could make my current service unaffordable.

Under the flat fee proposal you are considering, people who make few long distance calls would pay the same as people or businesses that make many calls. In other words, low-volume and primarily residential customers would bear the same universal service fund burden as a high-volume residential or business customers. This is unfair!

I use my wireless phone for safety, security and convenience. I don't want to lose these benefits so that big businesses can pay less than their fair share. I urge you to reject the proposal to move the USF collection system to a flat-fee.

Keep the USF Fair!

Sincerely,

Sharon Hitchcock
